ADITYA KAYANDE

Kolhapur, 416234 | 9373141481 | adityakayande00@gmail.com

Summary

B.Tech student in Computer Science and Business Systems with strong analytical, statistical, and programming skills. Proficient in Python, data visualization, and machine learning. Passionate about solving real-world problems through data-driven insights and intelligent automation.

Projects

Sales Forecasting using Time Series
Tools: Python, ARIMA, Statsmodels, Matplotlib

- Developed a machine learning pipeline to predict customer churn for a telecom dataset. Performed extensive data cleaning, handled missing values, and encoded categorical variables. Conducted exploratory data analysis (EDA) to uncover patterns in churn behavior. Trained multiple models (Logistic Regression. Random Forest, XGBoost) and optimized using GridSearchCV.

Content-Based Movie Recommendation System
Tools: Python, Pandas, Scikit-learn (TF-IDF), Cosi

- Built a personalized movie recommender using content metadata (genre, director. keywords, cast). Processed and vectorized textual features using TF-IDF and implemented cosine similarity to compute movie relevancy. Designed a clean UI using Streamlit for real-time recommendations based on user input.

Sales Forecasting Using Time Series Analysis
Tools: Python, Pandas, Statsmodels, ARIMA, Matplot

- Performed time series analysis on retail sales data to predict future demand. Applied moving averages and seasonal decomposition to understand trends and seasonality. Developed and tuned ARIMA models to forecast sales for the next 6 months. Evaluated model performance using RMSE and AIC metrics.

Skills

- **Programming Languages**: Python, SQL, Java
- **Libraries & Frameworks**: Pandas. NumPy, Scikit-learn, Matplotlib, Seaborn, Statsmodels, TensorFlow (for ML models)
- **Data Visualization**: Matplotlib. Seabom. Tableau. Power BI
- **Tools**: Jupyter Notebook, Google Colab. Git, GitHub
- **Databases**: MySQL. SQLite, PostgreSQL
- **Machine Learning**: Regression (Linear. Logistic). Classification, Clustering (K-means), Random Forests, XGBoost
- **Generative AI**: Expertise in leveraging Generative AI frameworks (e.g., GPT-3, Transformer-based models) for building chatbots and text generation system

Education

B.Tech in Computer Science and Business Systems: Engineering — **2027**
KIT College of Engineering, Kolhapur — Kolhapur

Certifications

IBM Data Science Professional Certificate (Coursera)

- Covers key aspects of data science including Python. data visualization, and machine learning.

Machine Learning Crash Course (Google AI)

- Free course from Google offering hands-on experience with machine learning. TensorFlow. and understanding the core principles of ML.
